APA14CA | Targus Charger for iPad®

The Targus Charger for iPad allows users to charge an iPad and other devices with USB charging capabilities through an AC outlet. The charger includes one USB cable designed to work with an iPad, iPhone or iPod. The charger can be used with other USB chargeable devices by connecting the USB cable manufactured for that device. The integrated AC plug folds down so it's out of the way and the prongs are protected when not in use. Once connected, the LED power indicator light lets users know when their device is receiving power. Small and compact, this charger takes up very little space in a travel bag and comes in handy if you need an additional charger for the road.

USB wall charger that works with the iPadiPhoneiPod and other devices that also charge via USB; includes one USB to 30pin cable

Small, lightweight and convenient; LED indicator light shows when the device receives power; integrated AC plug; included cable can be used to sync iPad, iPhone or iPod with computer
